

Ophir LOJKINE SENIOR SOFTWARE ENGINEER

+ CONTACT INFORMATION

Mobile phone  +33 6 44 85 27 35 **Nationality** French
Email  ophir.lojkine@free.fr **Date of birth** 16 April 1994
Home address 22 rue du Vertbois, 75003 Paris, France **GitHub** github.com/lovasoa

+ EDUCATION

2015-2017 **Bauman Moscow state university** (double-diploma)
Linear algebra, Databases, Big Data, software modeling, queuing theory, reliability theory, information security.

2013 – 2017 **École centrale de Nantes** (French *Grande École* of engineering)
Mathematics, Object-oriented programming, Functional programming, Answer-Set programming.

+ EXPERIENCE

PROFESSIONAL **2018 – 2020 : Senior Software engineer at AutoGrid.** Worked on a data platform handling all of Total's renewable power generation data in France. Wrote Python services that now handle sensitive and complex time-series in realtime in production every day. Worked on both large kubernetes clusters and embedded real-time devices with limited resources. Built data visualizations. Modeled a large multivariate optimization problem in Tensorflow.

2017 – 2018 : Data engineer at Qwant (search engine). Worked on all steps of the data acquisition pipeline. Improved reliability and performance of the company's web crawler bot. Created a classification and clustering model for user queries using a distributed K-Means on Apache Spark.

2015 : Data scientist intern at ERDF (now [Enedis](#), largest French electricity distribution company). Designed and implemented a forecast tool for network-level electrical consumption. Worked with a database of 10 million+ data points representing past consumption and meteorological data over several years. Used SVM with python and scikit-learn.

2014 : Front-end developer intern at AF83, worked on a large-scale web application (monalbumphoto.fr) using the agile methodology.

ACADEMIC **2016-2017 : master's thesis.** Modeling and comparing efficient join algorithms for distributed systems. Algorithm implementations in **Spark**, models in **python**.

FREE SOFTWARE [sql.js](#) : Fork and rewrite of the only port of **sqlite** to **javascript**. **~40 000 downloads / day**.
[dezoomify](#) : Image downloading web application. **~4200 unique users / month**.
[marshmallow-dataclass](#): Python data serialization library. **~1500 downloads / day**.

+ LANGUAGES

Russian	English	French
fluent (speaking, reading, writing)	full professional proficiency, TOEIC 930	Native

+ RELEVANT SKILLS

Data analysis Python (tensorflow, pandas, numpy, scipy, scikit-learn), Scala (Spark), SQL (PL/SQL, MySQL, sqlite), NoSQL (InfluxDB, Elasticsearch, CouchDB)	Tools IntelliJ, Atom, Vim, git , maven, jenkins, gitlab, jira
Application development Java (java8, spring), Python (flask, async), Rust , JavaScript , HTML5, CSS3, PHP, SQL , angular, Elm	Operating systems UNIX , Linux , Android, MacOS, Windows

+ PROFESSIONAL HIGHLIGHTS

I have a several-year experience of contributing to free software.

I love to take the initiative in exploring new interesting technologies and development techniques.

I am calm, consensus-seeking, and love to have long in-depth technical discussions.

+ HOBBIES

Ethical Hacking: I'm an eager player of root-me challenges, reported security issues to major websites (fnac.com, french engineering school admission system) and mobile apps (ruzzle). Got rewarded a bug bounty by Mozilla for a vulnerability on one of their websites. Reported bugs and security vulnerabilities to Firefox, Chrome, and Safari.

Theater: amateur theater group, Centrale Nantes

Travel : Russia, Belgium, Germany, Morocco, Hungary, Holland, Italy, Spain, Great Britain, Switzerland
